

Simulation Products

PPUK is a world leader in lighting solutions for the Aerospace and Defence markets, and from our extensive experience in supplying products to these sectors we have gained the experience to offer our unmatched knowledge to produce lighting products for the professional simulator markets. This includes products for Civil and Military Fixed and Rotary wing Aircraft, and all defence platforms.

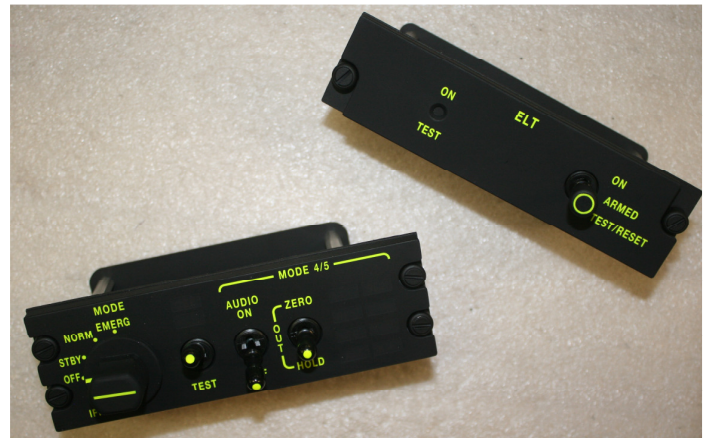

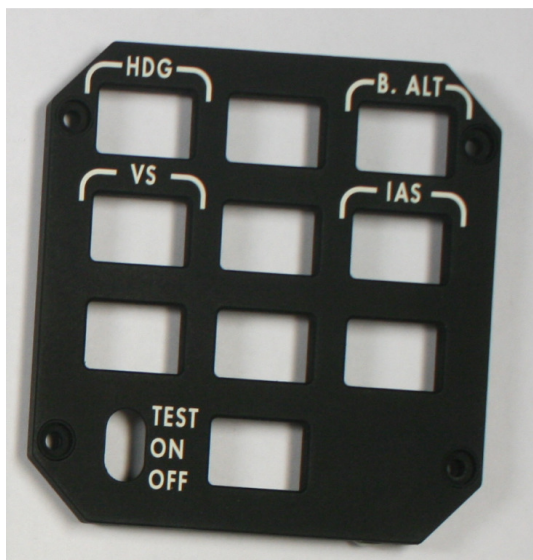

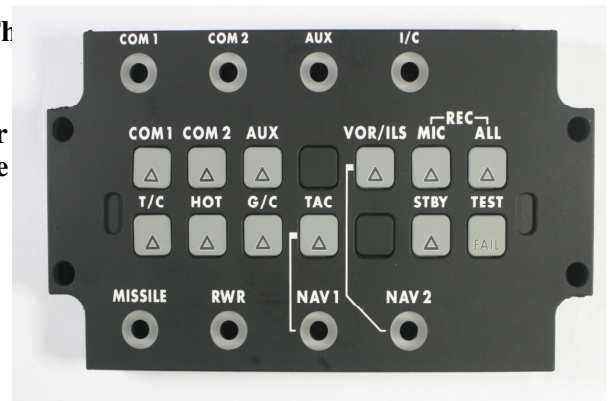

Our simulator panels and components are designed to offer value and low cost of ownership. We meet and maintain the exacting standards that are demanded by the professional simulator market and military users.

Products include:

- Aircraft Illuminated and Non-Illuminated control Panels.
- Master Warning Panels (MWP)
- Switch Bezels
- Indicators
- Control Knobs
- Assemblies

Lighting is normally achieved by utilising LED's which offer extremely long life and durability, however other lighting sources can be used if required.

We offer full NVIS lighting across all our products meeting the international standards MIL-STD-3309, MIL-L-85672 and MIL-DTL-7788.
